

High Pressure Fire Department Connections (FDC)

*Dixon Fire-designed, manufactured in the USA.
Jurisdictions and fire personnel have asked for higher pressures and higher flows
in demanding high use applications.*

Application:

- stainless-steel FDC provides water up to 90 stories without auxiliary pumping systems

Sizes:

- bodies: 4" and 6"
- snoots: 2½" x 2½" and 2½" x 3"

Features:

- uniquely designed clappers are fully reversible with perpendicular trunnion, allowing one body to be installed for top or bottom connections
- concealed unit mounts behind a wall plate; escutcheon sold separately for exposed installation
- made in the USA
- 100% tested

Materials:

- body: 316 stainless steel
- shutters: 4" x 2½": brass
6" x 3": 316 stainless steel
- snoots: 316 stainless steel
- pivot pins: brass on concealed units, stainless steel on exposed units

Specifications:

- 4" x 2½" maximum pressure: **500 PSI**
- 6" x 3" maximum pressure: **600 PSI**

Approvals:

- 4" x 2½" is Factory Mutual approved
- 6" x 3" is Factory Mutual and New York Fire Department approved

*Products shown with accessories as installed at 3 World Trade Center, New York, NY.**
