

Clever Clamp™

Features

- Consistent compression of the gasket with every use - no concern for damage to gasket or creation of internal bacterial traps from improper compression
- Adjustable for both rubber and PTFE gasket styles
- Fast installation, no torquing tools required
- Threadless design, eliminates risk of damaged threads leading to improper tightening of the wingnut
- Lockout ready design
- Self-locking lever and color-coding options available

¹ Service ratings are based on hydrostatic tests using standard-molded nitrile rubber, EPDM, FKM, and silicone material gaskets, with proper installation of ferrules, assembly of joints and absence of shock pressure or water hammer. Contact Dixon® for service of other type and material gaskets. All ratings shown are dependent upon related components within the systems and proper installation of those components. For temperatures above 250°F, we cannot provide service ratings. Before installation, testing must be done under the specific conditions of your application. Verify specific gasket material temperature ratings. This information is only applicable if Dixon® clamps, ferrules, and gaskets are used. Dixon® cannot guarantee the quality or integrity of other manufacturers components.
