## Flow Control Valves <br> Steel Series-F

## Features

- Two-step needle provides fine adjustments at low flow with the first three turns of the adjusting knob; the next three turns give full-open needle position and conventional throttling control; when flow is reversed, a heavy-duty poppet/retainer permits full-flow return capacity
- Color-coded reference scale simplifies flow setting, resetting, adjusting, and return to original flow; a simple set screw locks the valve on any desired setting

## Specifications

- Maximum operating pressure:

5000 PSI at $70^{\circ} \mathrm{F}\left(21^{\circ} \mathrm{C}\right)$ for $1 / 8^{\prime \prime}-1 / 2^{\prime \prime}$
3000 PSI at $70^{\circ} \mathrm{F}\left(\mathbf{2 1}^{\circ} \mathrm{C}\right)$ for $3 / 4^{\prime \prime}-2^{\prime \prime}$

## Features

- Provides precision flow control and full shutoff in one flow direction; automatically allows unrestricted flow in the opposite direction
- Two-step needle for fine adjustments at low flow with first three turns of the adjusting knob; next three turns give full-open needle position and conventional throttling control
- When flow is reversed, the heavy-duty poppet/retainer permits full flow return capacity

- Color-coded scale simplifies flow setting, resetting, adjusting, and return to an original flow
- A set screw locks the valve on any desired setting
