# Dust Caps & Dust Plugs with Pull Handles

Delivery hoses used on tankers are often stored in tubes mounted to the side of the tanker.

To make it easier for the tanker operators to remove delivery hoses from their storage tubes, Dixon has released **Cam & Groove Caps and Plugs with pull handles**. The tanker operator simply grabs the handle and easily pulls the hose out of the storage tube.

Some additional benefits of using **Cam & Groove Caps and Plugs with pull handles** are they:

- protect the hose coupling from damage.
- help prevent possible environmental issues due to leaking residue left in an open hose.
