Brass Lead-Free Fittings

LEAD-FREE FITTINGS ARE NSF® CERTIFIED

Potable water systems provide water suitable for human consumption such as drinking, food preparation, and dish washing. The Safe Drinking Water Act limits the lead content of components installed in potable water systems to 0.25% weighted average.

Dixon-manufactured lead-free parts, made with brass alloy C27450, are NSF[®]/ANSI 61 certified.

Certification ensures that our lead-free products meet the regulatory requirements for drinking water system components for the U.S. and Canada. The NSF mark on each part is your assurance that the product has been tested by a respected independent certification organization.

Our offering targets a selection of popular configurations and sizes in our standard hose, lok-on hose, pipe, and garden hose fittings.

Lead-Free Product Series

- 102 Lead-Free Hose Barb x Male NPTF 104 Lead-Free – Hose Barb x Female NPTF
- 143 Lead-Free Female Swivel Hose Barb x JIC/ SAE
- 178 Lead-Free Hose Splicer
- 272 Lead-Free Lok-On Hose Barb x Male NPTF
- 370 Lead-Free Male NPTF Hex Nipple
- 371 Lead-Free Female NPTF Hex Coupling
- 373 Lead-Free Male-Female NPTF Reducer Bushing
- 375 Lead-Free Female-Male NPTF Adapter
- 377 Lead-Free Female NPTF x Female NPTF Reducer Coupler
- 502 Lead-Free Female GH x Female NPTF Swivel
- 506 Lead-Free Female GH x Female GH
- 507 Lead-Free Male GH x Female NPTF
- 508 Lead-Free Male GH x Male NPTF
- 509 Lead-Free Male GH x Male GH x Female NPTF
- 514 Lead-Free Male GH x Male NPTF x Female NPTF
- 590/593 Lead-Free Hose Barb x Male GH
- 591/594 Lead-Free Hose Barb x Female GH
