

Valves tested to ASME B16.34/API 598.
Meets MSS SP-117.

A detailed view of a 1-800 industrial valve. The valve has a blue handwheel on top, a black body, and a black handle. The handle has a silver-colored spring. The valve is mounted on a black base. The base has a silver-colored label that reads "1-800". The valve is shown from a side-on perspective, highlighting its mechanical components and the blue handwheel.

Complies with material standard ASTM A105 and threading standard ANSI B120.1.

A stainless steel manual pump sprayer. It features a cylindrical body with a handle on the left and a spray nozzle on the right. The handle has a textured grip. The nozzle is a long, thin tube with a small opening at the end. The body has a label with text and a logo. The top of the body has a threaded cap. The bottom of the body has a small opening. The entire device is made of polished stainless steel.

A blue and silver flashlight with a handle and a trigger switch. The handle is blue and has a trigger switch on the side. The flashlight body is silver and has a black lens at the front. The brand name "VORON" is visible on the side of the silver body.

Whether supplying steam to a refinery, utility station, or supporting other demanding industrial applications, safety, reliability, and leak prevention are critical to operational success. Dixon offers a comprehensive range of products engineered for steam service, helping customers improve system performance while minimizing maintenance and downtime. When it comes to dependable products, responsive service, and innovative solutions, Dixon is the partner you can trust.
