**Part numbers are generated using the rules:**

"Smallest size to largest size," if it's the same size on both threads then we use " pipe thread to fire thread size," i.e. if the desired part has a:

- 1) 3" NPS x 2.5" NST the part number would be N35-25F30S
- 2) 3: NST x 3" NPS the part number would be N35-30S30F
